Amparo García Vidal

FULLSTACK DEVELOPER · FREELANCE

Frontend developer with fullstack experience. I started in 2017 building energy efficiency dashboards, then worked on defence software (GMV) and payment terminal apps (Handpoint). Since 2025 I build custom web applications as a freelancer.

WORK EXPERIENCE

Freelance

Oct 2025 - Present

Fullstack Developer

Custom web applications

- I handle each project end to end: requirements with the client, design, development and deployment.
- React or Angular on the frontend, Node.js with PostgreSQL on the backend.

CRM Seguros & Energía

Web App · CRM
Demo: dev.insurance-energy-crm.pages.dev

Multi-user CRM for an insurance and energy brokerage. Manages clients, sales, policies, energy contracts, cases and incidents, and employee time tracking. OWNER/EMPLOYEE roles with granular permissions, JWT auth and i18n.

- React 19
- Vite
- TypeScript
- i18next
- Node.js
- Express
- PostgreSQL
- Prisma
- JWT

Nutrition Dashboard

SaaS · Web App
SaaS platform for nutritionists: patient management, body measurement and physical activity tracking, and diet generation with the Edamam API. Supabase with Row Level Security to isolate each practice's data.

- React 19
- Next.js 16
- TypeScript
- Recharts
- PostgreSQL
- Supabase
- Edamam API

Nutrition App

Mobile App · Ionic + Capacitor
Cross-platform mobile app for patients to track their health and nutrition. Charts with ECharts and CI with GitHub Actions and Docker multi-stage builds (lint, tests and an Nginx-served build).

- Angular 20
- Ionic
- Capacitor
- TypeScript
- ECharts
- Docker

Handpoint S.L.

Sep 2020 - Jul 2023

Software Developer

Fintech · Payment terminals

- Cross-platform Android and iOS apps with Angular, Ionic and Chart.js. Unit testing with Karma and Jasmine.
- Android SDK maintenance: migrated it from Java to Kotlin, with JUnit and Mockito tests.
- REST APIs deployed on AWS with Docker and Terraform.
- Also worked on the Node.js backend.

- Angular
- Ionic
- Kotlin
- Java
- Node.js
- Docker
- AWS
- Terraform

GMV Aerospace & Defence

Mar 2019 – Sep 2020

Software Developer

Defence · Tactical software (EUCCIS)

- Built the New Tactical Viewer for EUCCIS, a NATO command-and-control system.
- Frontend with Angular and TypeScript, using AG Grid, Kendo UI and Luciad RIA/Fusion.
- Worked with the Java backend team.
